August 17, 2021

The Village of Shortsville requests that residents practice water conservation measures on August 23<sup>rd</sup>, 24<sup>th</sup>, 25<sup>th</sup>. This is in response to the Village of Newark's Water Treatment Plant construction project. The new 2-million-gallon clear well connection to the water transmission main will take place during the week of August 23<sup>rd</sup>. We anticipate the new connection will take 8 to 12 hours to complete. If problems are encountered during the installation of the new water main connection the implementation of water conservation measures will minimize the impact to the water distribution system. If you have any questions, please contact the Village Office at (585)289-6104.
